

Behavior *affected* by Belief

Psalm 10:1-12

How a person **behaves** is vitally connected to what a person **believes**. Many today have believed the Satanic lie of evolution and this has affected human behavior in a major way. For example, leading Nazis and German biologists revealed in their writings that Darwin's theory had a major influence upon Nazi race policies. Although it is no easy task to assess the conflicting motives of Hitler and his supporters, Darwin-inspired eugenics clearly played a critical role. If the Nazi Party had fully embraced and consistently acted on the belief that all humans were descendants of Adam and Eve and equal before the Creator God, as taught in both the Old Testament and New Testament Scriptures, the Holocaust never would have occurred.

If a person believes that he was created by no one, but that he owes his existence to blind chance, then he can find no real purpose or meaning to his existence. Such a hopeless world view often leads to lawless conduct since there is no perceived accountability to a Higher Being.

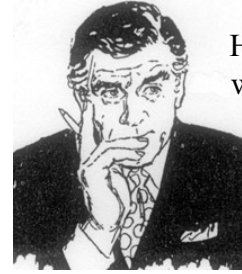

Before his death, convicted murderer Jeffrey Dahmer (a most notorious mass killer) made the following comment on the *Dateline* NBC program (November 29, 1994): "If a person doesn't think that there is a God to be accountable to, then what's the point of trying to modify your behavior to keep it within acceptable ranges? That's how I thought anyway. I always believed the theory of evolution as truth, that we all just came from the slime. When we died, you know, that was it, there is nothing, and I've since come to believe that the Lord Jesus Christ is truly God, and I believe that I, as well as everyone else, will be accountable to Him."

Only a vibrant faith in God and His inerrant Word will counter the godless philosophies of our age!
